CERTIFICATIONS

- Penetration Testing Engineer
- Security Blue Team
- TCM Security
- Network Defence, CISCO
- Endpoint Security, CISCO
- Cyber Threat Management, CISCO

Bug Bounty Hall of Fame Achievements & Awards

- NASA Letter of Recognition
- Certificate of Appreciation from Bali Provincial Government
- Thank You Card + Swag Pack from Singapore Government Technology Agency GovTech
- YesWeHack Comet Award
- Nasa Hall of Fame
- Telenor Sweden Hall of Fame
- GovTech Hall of Fame
- Telekom Hall of Fame
- Information Disclosure Badge from GovTech
- Cryptography Badge from GovTech
- Secured over 40 + Companies globally

PROFESSIONAL EXPERIENCE

- Independent Security Researcher / Bug Bounty Hunter
  Freelance 11/2024 - Present

- Identified and responsibly reported over 100 vulnerabilities including critical account takeovers, authentication bypass, mass data exposure across public and private programs.

- Defence Research and Development Bureau, Defence Headquarters
  Research Assistant 02/2024 - Present
  - Analyze and interpret research data
  - Maintain accurate records and organize research materials
  - Experiment design and execution
  - Reports and presentations.
- City Drivers-NG
  Penetration Tester 11/2022 - 01/2024
  - Reconnaissance and planning
  - Vulnerability assessment and exploitation
  - Risk analysis and reporting
  - Post-engagement and re-testing
- KOAT Technology Ltd
  Cyber Security Analyst 01/2020 - 11/2022
  - Threat monitoring and detection
  - Incident response and handling
  - Vulnerability management
  - Security awareness and policy enforcement

PROJECTS & OPEN SOURCE CONTRIBUTIONS

- TOOL - Subdomain tracker [Github link: https://github.com/hxxfrd/subdomain-tracker]
  This is a custom built, automated script I wrote in python to automatically discover and track new subdomains associated with a primary domain name. The creation of this script required advanced programming skills and a deep understanding of network security.
